COMPANY PROFILE 2026

Integrated logistics for complex, critical and time-sensitive supply chains.

One accountable UAE platform for freight, customs, bonded warehousing, 3PL and specialist logistics.

Since 2007 | Dubai, UAE

Architectural visualization of Alpha Star's new JAFZA operating base.

The supply-chain problem we solve

Complex logistics becomes expensive when ownership is fragmented across too many providers.

THE PROBLEM

Too many handovers
Different providers for freight, customs, storage and delivery.

Slow exception handling
Issues are discovered late and ownership is unclear.

Limited visibility
Inventory, documents and status updates sit in separate systems.

Time pressure
Critical cargo cannot wait for standard operating timelines.

THE ALPHA STAR MODEL

One accountable platform. One operating plan. One clear owner.

Alpha Star combines multimodal freight, customs, bonded storage, value-added operations and final delivery through one UAE control point.

- Reduced coordination loss
- Clear escalation ownership

Alpha Star at a glance

A long-standing UAE logistics business now scaling through infrastructure, specialization and technology.

Since 2007
UAE market presence

10,000 m²
JAFZA facility area

12,000
Pallet positions

What the platform is built to do

Move

Air, sea, land, cross trade and multimodal

Store

Bonded and mainland warehousing with VAS

Control

Customs, DG, permits, documentation and reporting

Deliver

UAE, GCC and regional final-mile execution

Facility metrics are based on current Alpha Star management specifications.

One operating platform. Four connected capabilities.

A founder-led profile should show how the system works, not only list services.

MOVE

- Air freight and charters
- Sea freight and NVOCC
- UAE and GCC land freight
- Cross-trade and multimodal

STORE

- JAFZA bonded warehousing
- Mainland 3PL operations
- Pallet, batch and lot control
- Value-added services

CONTROL

- Customs brokerage
- DG and regulatory coordination
- SOP and document control
- WMS and customer reporting

DELIVER

- UAE and GCC distribution
- Ship spares onboard delivery
- AOG and OBC response
- Project and OOG execution

The platform model reflects Alpha Star's integrated operating scope across the uploaded company profiles.

A new JAFZA operating base

Office, warehouse operations and client coordination integrated at one location.

JAFZA CAMPUS

A client-facing operating base beside Alpha Star’s new warehouse infrastructure.

On-site management

Commercial, operations and customer coordination teams

Client-ready spaces

Meeting rooms for onboarding, SOP reviews and business discussions

Warehouse-linked execution

Direct coordination with bonded storage and value-added operations

Architectural visualization. Final external finishes and signage may vary.

Warehouse built for scale and control

High-bay infrastructure designed for bonded inventory, VNA racking and regional distribution.

10,000 m²
Total facility area

12,000
Approx. pallet positions

14
Loading bays / docks

21 m
Clear height
VNA racking in place

- Ambient and temperature-controlled storage zones
- WMS-based pallet, batch and lot traceability
- Strong-room capability for high-value cargo
- Cross-stuffing, VAS and bulk storage areas
- Client coordination rooms and on-site operations

High-bay visual is representative. Facility metrics are based on current management specifications.

From pre-alert to final delivery

Every handover is managed through one accountable operating flow.

1

Pre-check

Documents, product and customs review

2

Transfer

Port or airport to JAFZA bonded facility

3

Receive

Count, condition check and photographs

4

Record

WMS entry by pallet, batch and lot

5

Operate

Storage, labelling, packing or sampling

6

Release

Re-export, UAE delivery or GCC distribution

The result: clear ownership, fewer handovers, faster issue resolution and a complete inventory trail.

Visibility without unnecessary complexity

Clients see what arrived, where it is, what changed and what is ready to release.

Illustrative inventory view

Product	Batch / Lot	Pallets	Status	Location
Industrial input A	LOT-2607-A	6	Received	AC Zone A
Industrial input B	LOT-2607-B	6	Available	AC Zone A
Sample request	SR-001	—	Pending	Controlled area

Client outputs Receiving photographs • Inventory statement • Exception updates • Release confirmation

Evidence

Condition photographs at receipt

Traceability

Batch, lot and pallet history

Reporting

Client-specific MIS and stock views

Exceptions

Fast visibility of holds or actions

Multimodal freight, one accountable team

Core transport products connected to customs, warehouse and final delivery execution.

Air freight

Imports, exports, cross trade, AOG, OBC and charters

Sea freight

FCL, LCL, NVOCC, RoRo, breakbulk and projects

Land freight

UAE, GCC and regional FTL, LTL and special transport

Customs brokerage

Declarations, bonded transfers, permits and re-export

Multimodal

Sea-air, air-sea, air-air and cross-border combinations

Cross trade

Origin-to-destination coordination without UAE entry

Service descriptions consolidated from the uploaded company profiles and JAFZA capability deck.

Time-critical logistics when delay is not an option

Specialist response for cargo that requires speed, technical coordination and constant communication.

When the shipment is urgent, the operating model changes.

Alpha Star assigns a dedicated response owner, priority communication and active exception management until delivery is complete.

Ship spares

Door-to-deck, landing spares and emergency vessel delivery

AOG

Priority aviation parts, airport recovery and direct delivery

OBC / hand carry

Professional flyer network for urgent international movement

Air charter

Aircraft sourcing and end-to-end charter execution

DG cargo

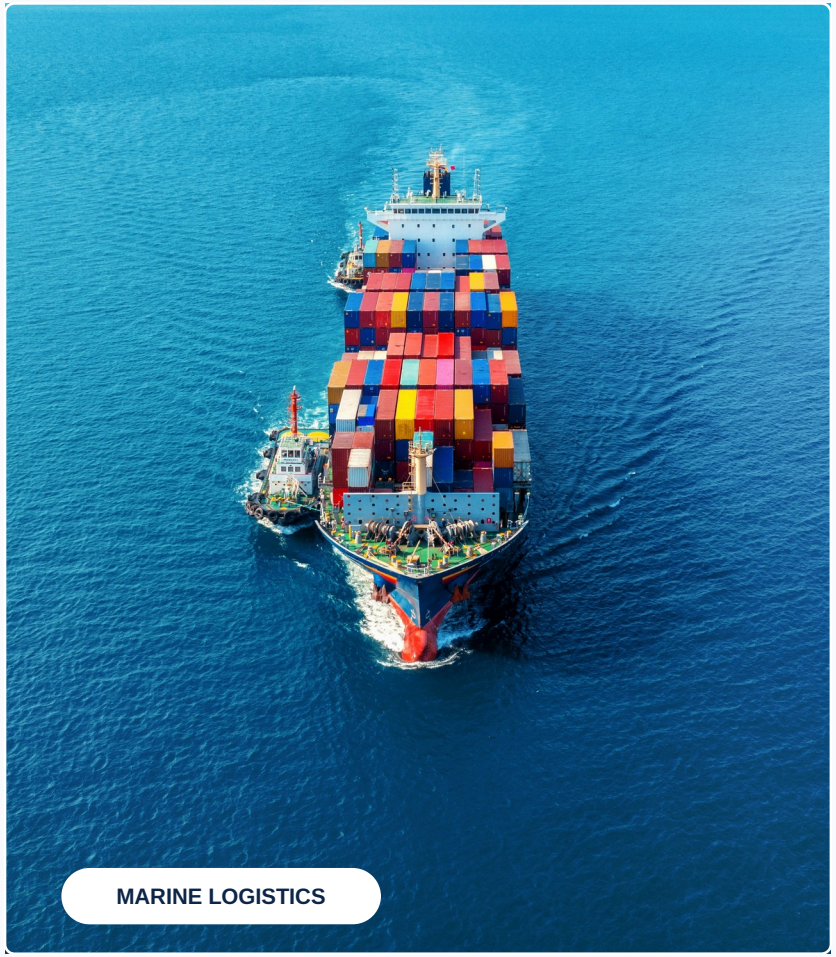

Certified handling, documentation and operational control

Project cargo

Heavy, oversized and customized movements

Ship spares: door-to-deck execution

A specialized operating model for ship owners, managers, dry docks and marine suppliers.

2,000+

Onboard deliveries / year

300+

Landing spares / year

800+

Vessels supported

12+

Global warehouse hubs

Consolidate → Forward → Customs → Deliver onboard

Ship spares metrics are taken from the current uploaded ship spares brochure.

Air cargo and CSA capability

Commercial access, operational execution and specialist response across priority air corridors.

EXCLUSIVE CSA CAPABILITY

Turkmenistan Airlines cargo representation in the UAE.

The CSA platform strengthens Alpha Star's access to capacity, commercial development and Central Asia connectivity, while the wider air team handles standard, urgent and charter movements.

Capacity access
Direct airline coordination and commercial support

CIS connectivity
Turkmenistan and Central Asia routing expertise

AOG and OBC
Priority response for time-critical cargo

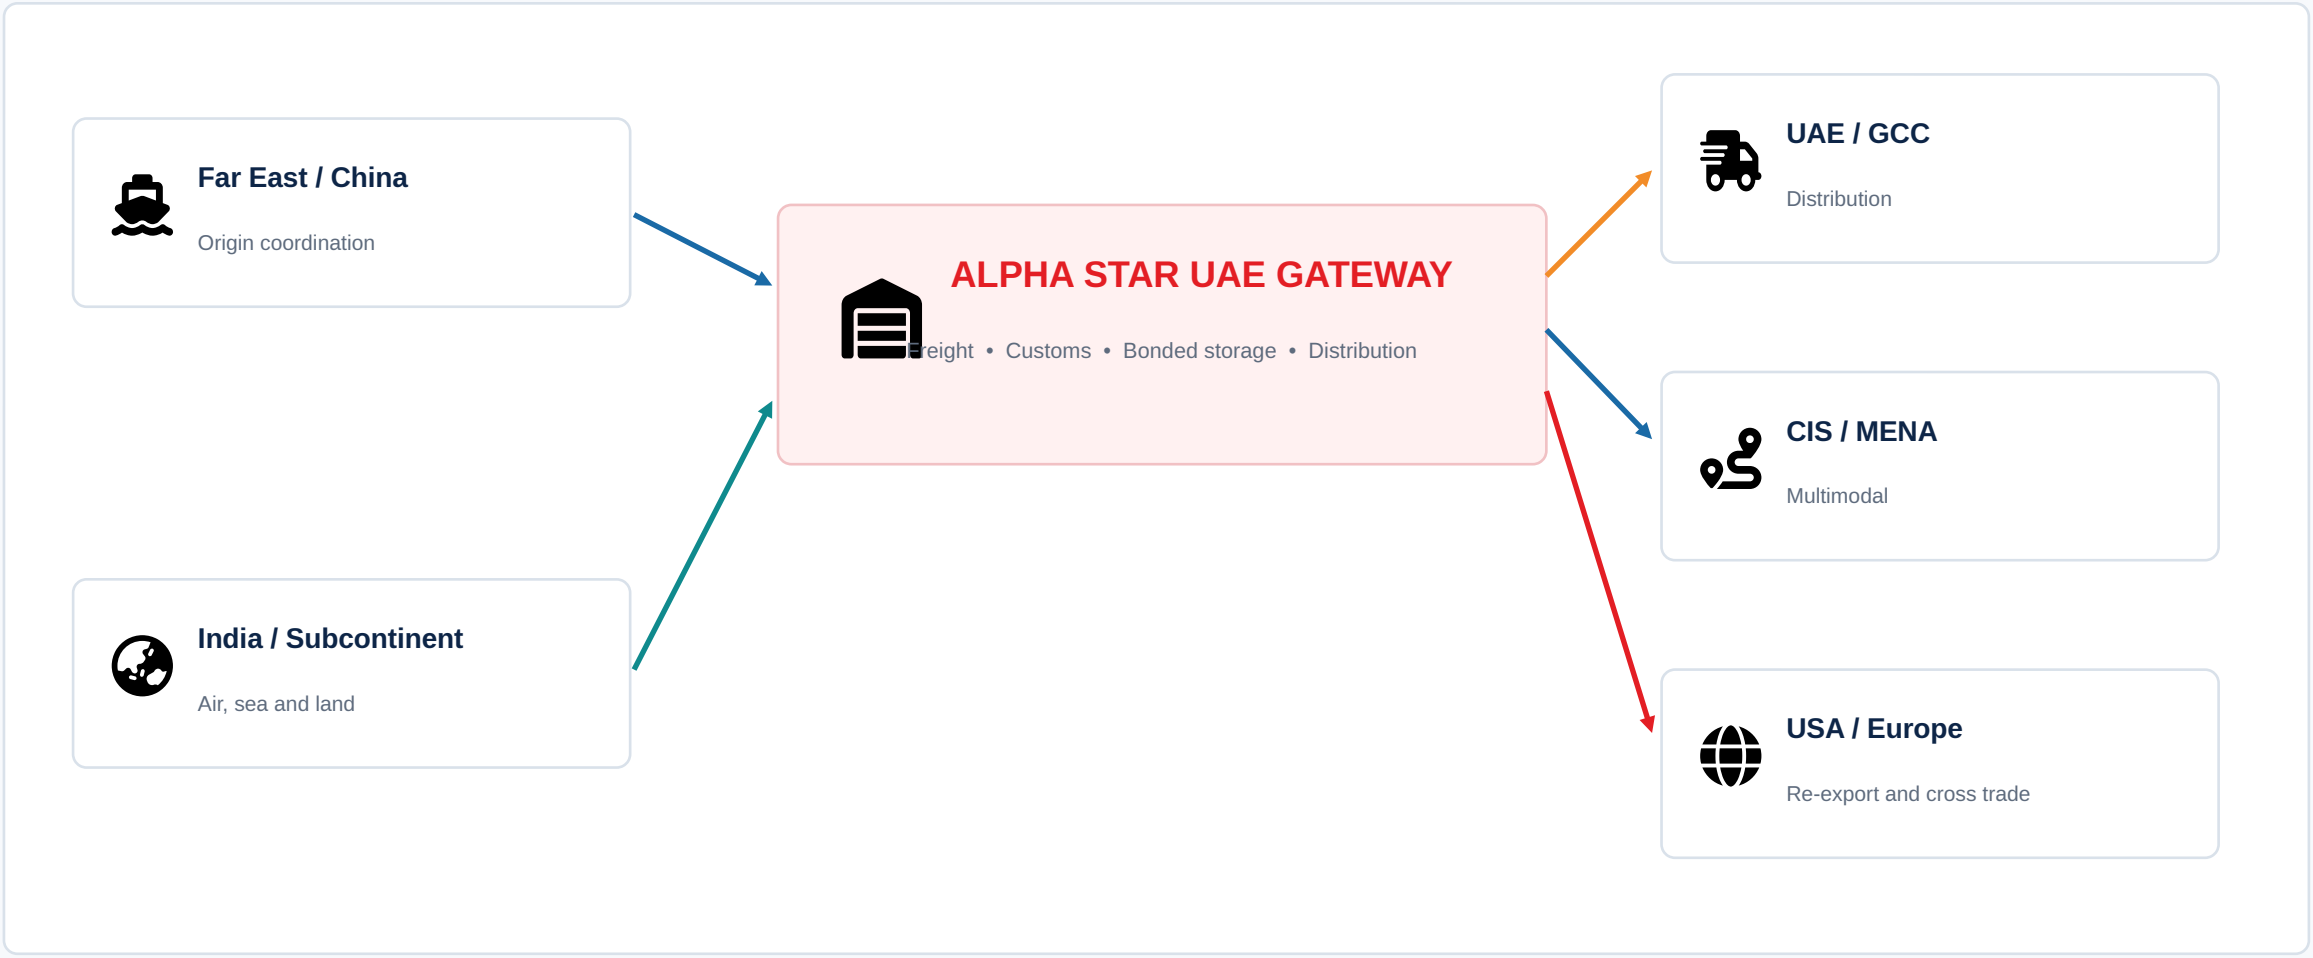

Charter execution
Aircraft sourcing, load planning and operations

DG capability
GCAA-approved dangerous goods handling

Global partner reach
Origin and destination coordination worldwide

Regional and global trade corridors

Dubai is the control point connecting origin freight, bonded inventory and onward movement.

Corridor coverage reflects Alpha Star's stated operating focus across GCC, MENA, CIS, Europe, Asia and North America.

Focused where logistics complexity is highest

Industry expertise combines specialized handling, compliance and time-critical execution.

Marine and ship spares

Door-to-deck, landing spares and dry-dock logistics

Oil and gas

OOG equipment, DG, projects and remote-site support

Aviation and AOG

Aircraft parts, urgent uplift and charter solutions

Critical materials

Controlled storage, traceability and re-export

Pharma and healthcare

Sensitive cargo, documentation and temperature needs

Electronics and high value

Secure handling, strong room and priority delivery

Industrial projects

Machinery, heavy lift, ODC and customized routing

Retail and e-commerce

Inventory, fulfilment and UAE distribution

Execution proof across complex cargo

Selected movements demonstrate the breadth of Alpha Star’s operating capability.

PROJECT LAND

25 m crane girder

JAFZA to Kuwait

MARINE PROJECT

Mewis duct

Spain to Bahrain dry dock

AIR FREIGHT

30-ton electronics

Dubai to Turkmenistan

DANGEROUS GOODS

Liquid helium dewars

DG air export

AEROSPACE

Aircraft engine

Dubai to Singapore

OOG PROJECT

Oil and gas equipment

Mina Zayed to Jebel Ali

Project images and descriptions are sourced from the uploaded Alpha Star company profile.

Trusted for critical and high-value movements

Long-standing relationships are built through reliable execution, response speed and transparent ownership.

RELATIONSHIP PROOF

10+ years supporting Saipem logistics requirements.

A relationship of this duration reflects operational consistency, procurement trust and the ability to perform across changing logistics requirements.

Selected relationships and experience

- Saipem
- SLB
- Sony
- Honeywell
- Mitsubishi
- Biocon
- Gulf Marine
- ADNOC

Selected logos are presented as customer and project experience references from the uploaded company profiles.

Leadership built around execution

Industry experience, operational discipline and relationship-led growth.

Noorul Ameen

Chairman

30+ years

Marine logistics, industry insight and global partnerships

Mustufa Dharodia

Managing Director

25+ years

Strategy, financial leadership and expansion oversight

Muneeb Arif

Operations Director

10+ years

Operational excellence, projects and digital transformation

Abdul Mateen

Director – Sales

10+ years

Global sales, network expansion and strategic alliances

Credentials that reduce onboarding friction

Recognized quality, customs, air cargo and network credentials for procurement and compliance review.

UAE AEO

Authorized Economic Operator

ISO 9001 • 14001 • 45001

Quality, environmental and OH&S systems

IATA CASS

Accredited air cargo capability

GCAA DG Approval

Dangerous goods handling capability

FMC

USA ocean trade capability

Dun & Bradstreet

Registered business credibility

WCAworld

Global freight forwarding network

TIACA

THE INTERNATIONAL AIR CARGO ASSOCIATION

Certification and membership documentation can be shared during onboarding against the confirmed scope.

WHY ALPHA STAR

One accountable team. Multiple logistics capabilities.

- UAE market presence since 2007
- Integrated air, sea, land, customs and warehousing
- JAFZA infrastructure built for scale and control
- Specialist strength in ship spares, AOG and project cargo
- Modern WMS, documented handovers and clear visibility
- Relationship-driven service and direct management involvement
